# Global Broking

Wholesale market participants can use ICAP's broking services to assess trading availability and successfully execute trades.

ICAP has a depth of experience with a wider global access than most of our competitors. Our brokers locate and identify potential trading interest and in so doing create transparency and liquidity, and facilitate the price discovery process. This is particularly important in markets where there is a wide range of potential transaction types and the number of parties willing to enter certain transactions at any moment may be limited.

We offer broking services for a wide range of asset classes including rates, FX, commodities, emerging markets, credit and equities. For each of these asset classes, ICAP's electronic capability gives customers the choice to enter prices and execute trades electronically, directly via one of ICAP's electronic trading systems, and/or to engage with a broker to identify and help negotiate trades.

Customers range from investment banks for our fixed income products to end-user corporates and industrials for commodities.

## ICAP as a Swap Execution Facility

ICAP has served OTC and exchange traded derivatives customers for many years by offering fair, liquid and robust markets.

The regulatory framework that has been created in the US by the Dodd-Frank Act provides us with the
