Healthy Me

While it's crucial to take care of your brain, it's just as necessary to maintain a healthy body as well. This is the main focus of the second land in JumpStart Academy Preschool, "Healthy Me." As users play through this map, they will learn how to take care of themselves with a proper diet and exercise!

Players will learn about what it means to be active and having a balanced diet. Each lesson will be delivered by one of the in-game characters. For example, your child will learn about why it's important to brush their teeth regularly from Eleanor. "Healthy Me" will also focus on how they can get regular exercise by playing, and they will learn about eating junk food in moderation. This land will also stress the values of eating fruits and vegetables.

Kids will learn about how important it is to take care of their minds as well as their bodies as they navigate through this world. Of course, staying well and making good choices is easier when you have pals by your side, so Eleanor, Kisha, and more fun friends will be there to guide them! As they play "Healthy Me," your young scholar will master the essentials of healthy living!

My Family

In the land of "My Family," your child will learn about their family. Here, players will grasp the importance of living in a family. At this age, children are starting to understand chores, family roles, and pet care, and your preschooler will build on these topics as they play.

It is important that preschoolers understand how to cooperate within a family. As they navigate through "My Family," they will encounter crucial lessons that are guaranteed to help them develop inter-familial skills. For example, your young scholar will learn how to properly take care of pets by making sure to feed them, clean them, and play with them often. Preschoolers will also learn about helping their parents out around the house – whether that be cleaning up after themselves, doing chores, or giving warm hugs. And of course, sharing is caring! We will expose your child to the importance of sharing with others around them and how that will help them make friends. The game will also teach your little learner about how much fun it is to spend time with their grandparents.

This land is essential because it covers one of the most important topics – family! JumpStart cares about making sure that

your preschooler will not only learn about the people that love them the most, but they will also grasp the basics of contributing to the household. As they play through the game, your precious preschooler will understand the significance of being a part of a caring family!
