Germs in Space DreamKit

\$79.95

These STEM experiment kits provide the opportunity to explore the exciting research on the International Space Station.

Each Germs in Space DreamKit contains:

- equipment needed to implement the experiment including gloves, sterile swabs, and Petri plates with agar
- an exploration guidebook with detailed instructions, lessons on space, in-depth descriptions of the science behind the experiment, fun activities and more
- access to the exclusive online portal to compare the results on the ground with the results in space

Description

Reviews (0)

Your learner will have the opportunity to explore the exciting research on the International Space Station. With Germs in Space, learners explore what bacteria and other small life lives around them every day, and they can compare what they find with what astronauts have found living amongst them on the International Space Station! The kit comes with everything you need to implement your experiment; an exploration guidebook with instructions, scientific information, and activities; as well as access to an online portal to compare the results on the ground with the results in space.
