Smarter Meetings. Faster Follow-Up.

Voicera is a voice collaboration platform powered by an Enterprise Voice Assistant named EVA. EVA is an AI that takes commands, performs actions and captures highlights in meetings to share them and create actionable recaps. With EVA on conference lines, on calls, or in-person, you can focus on the conversation knowing EVA will capture and share whatever you highlight. Turn talk into action with Voicera.

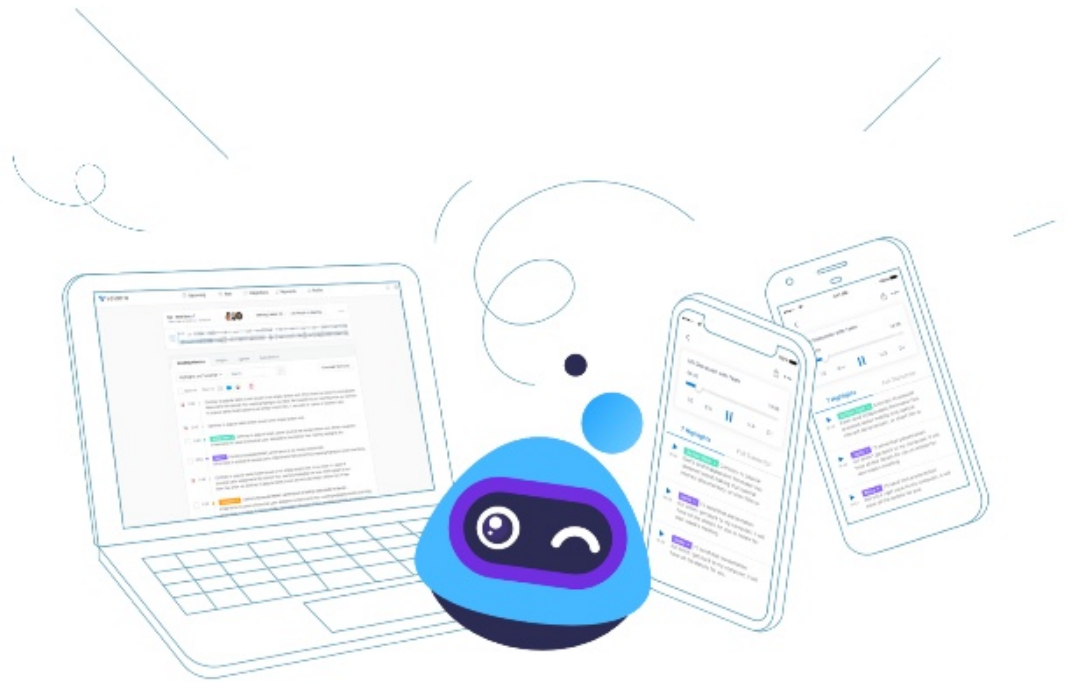

[Try It Free](#)

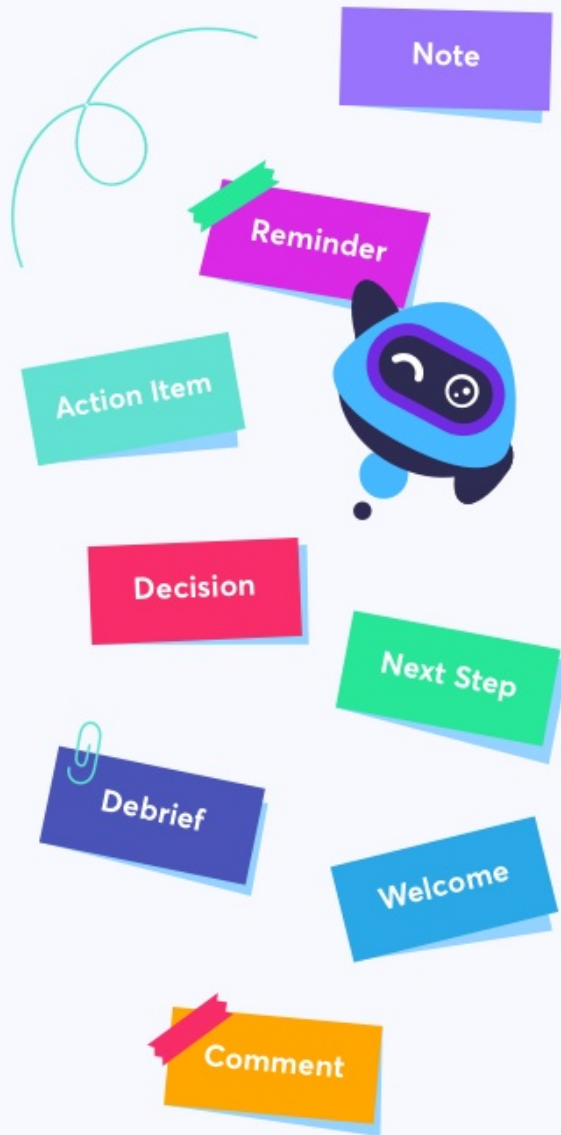

EVA Takes Your Commands

Voicera enables you to have your own AI in meetings to capture key takeaways and turn talk into action. EVA takes Voice Commands to create reminders, tasks, answer questions and provide meeting recaps. For example, say "Okay EVA, remind me to send the presentation to Tom, Thursday at 4pm" and watch EVA go into your calendar to create a reminder. Voicera is the leader in developing a voice assistant solely for use at work, customized to your needs for increased productivity and better team collaboration.

EVA captures key takeaways and meeting highlights

Easy to use

Add eva@voicea.com as a meeting attendee or sync your calendar and EVA will auto-join any meeting with a dial in. You can also open the mobile app and start a recording for in-person meetings.

Actionable

Voicea connects what happens in your meetings to the rest of your collaboration workflow, pushing notes and action items through email, Slack, Salesforce and taking basic voice commands to execute specific actions.

Ubiquitous

EVA works in any type of meeting - conference calls, direct calls and in-person meetings. You can view a live speech-to-text as well as all your past meeting minutes anytime through a desktop or the mobile app.

Customizable

You can customize what EVA is identifying as important, or tell EVA directly. The highlights are tailored to you and your business. Make sure what gets captured is important for you.

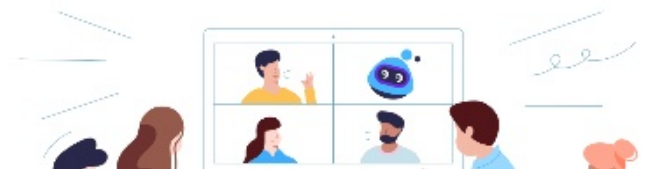

EVA works for all your meetings

Customer Meetings

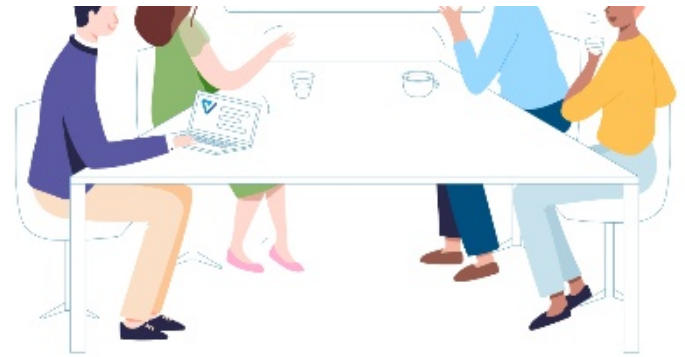

Activate the "voice of the customer". Let EVA take notes and bring the meeting to your team. Clear up confusion on actions or follow up items. Make sure your entire team knows what needs to get done.

Internal Team Meetings

Internal status or stand-up meetings are full of actions to be taken. Make sure everyone knows what needs to get accomplished, even if they weren't in the meeting. Give the meeting life after the hour it was held.

Status Meetings

Automatically update your systems like Salesforce or Slack with status across the entire team without lifting a pen.

Research Meetings

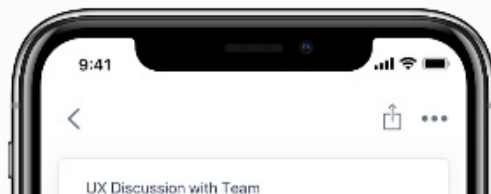

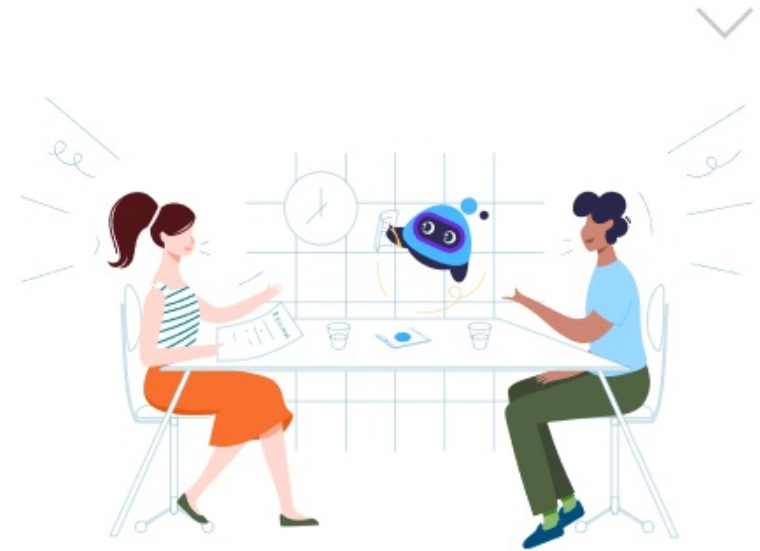

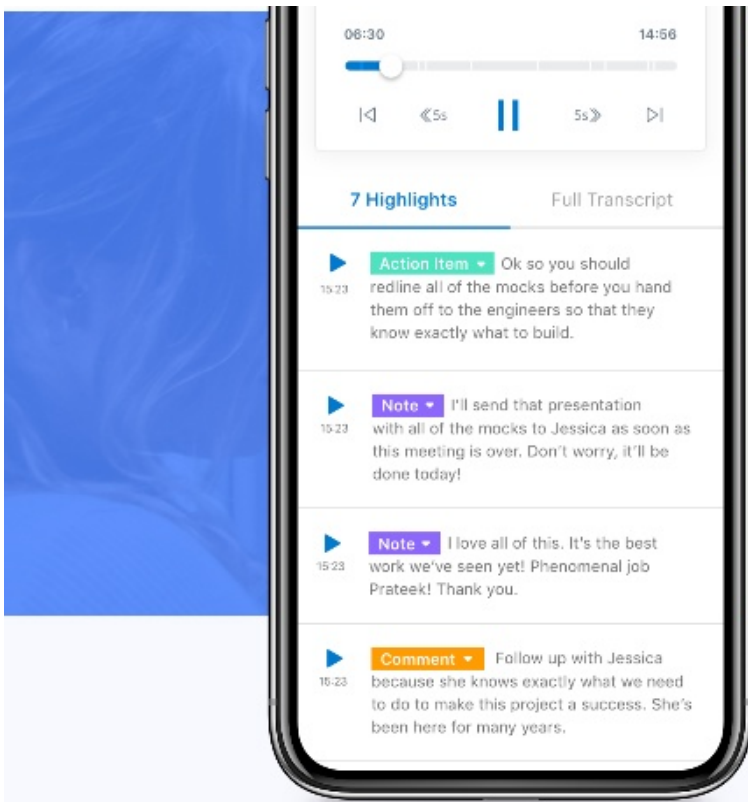

Never miss a detail in any research meeting or focus group, and never ask someone to repeat themselves when they have a brilliant thought that you wish you had captured!

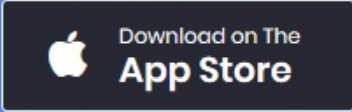

Interviews

Ensure candidate interviews enable a full 360 degree view of your potential new hire. Allow all the interviewers to hear the thoughts of the candidate directly. Share notes and make sure you hire the best person with the full consensus of your team.
