

Applied Research and Analytics

Our research goes beyond describing a problem—it's the foundation on which we build solutions to advance health. Altarum's insights are designed for practical application and achieving measurable results.

Services

Economic Modeling and Analysis • Policy Analysis • Survey Science • Health Care Value Analysis

Our analysts, statisticians, and research scientists work every day to deliver more value in the US health system while controlling costs. We do research, we conduct surveys, we reveal uncommon insights. All this leads to better outcomes for our clients. See examples of our recent and current work below.

Using Data to Advance Care in the Military Health System

Learn how our data insights lead to higher satisfaction rates among Defense Health Agency patients.

HEALTHCARE VALUE HUB

Altarum's Healthcare Value Hub

The Hub is the premier online resource for policy makers, advocates, and health officials looking for guidance on policies and practices that provide better overall value to health care consumers.

Community Health ROI

Learn how our analytical tool helps communities measure the value of investments in social determinants of health.

Health Sector Spending

View our monthly health sector spending reports, and our strategies for achieving sustainable health spending.

PROMETHEUS VALUE

PROMETHEUS Value

Our analytical tool measures low-value care and pinpoints sources of wasteful spending.

Surveying Veterans to Improve PTSD Treatment

Altarum is conducting a survey of 14,000 veterans to obtain insights about how stress impacts their health.

Contact Us

Tara Fowler - PhD, MPH, CPH
Director, Healthy Women and Children

Areas of Expertise

- Applied Research and Analytics
- Maternal and Child Health
- Qualitative Research

Tara leads a portfolio of work in children's and women's health, oral health, and nutrition. She has led a variety of multifaceted quantitative and qualitative research projects that deliver insights to leaders of government health agencies, from the Defense Health Agency to the Health Resources and Services Administration. Her recent work includes an evaluation of a HRSA-funded program implemented in 16 states to improve oral health of low-income pregnant women and infants. Tara holds a PhD in public health from the University of South Florida.

Contact

Greg Matthews
Deputy Director, Value in Health Care

Areas of Expertise

- Analytic Tools
- Applied Research
- Evaluation

As an expert in statistical science and data analytics, Greg works with public insurers and health systems to achieve better outcomes. He is the lead for PROMETHEUS Analytics®, Altarum's proprietary software platform that yields insights from claims data. Greg holds a master's degree in sociology from the University of Washington.
