

## Accredited Continuing Healthcare Education

We specialize in clinical QI training proven to positively impact patient outcomes while providing accredited education across a wide spectrum of healthcare providers. In addition, we are developing an online continuing education catalog of accredited activities. Altarum is an approved Portfolio Provider of MOC Part IV education credit.

### Accreditations

Altarum is accredited with the following organizations to provide educational activities:

Altarum also offers accredited education for many other types of healthcare providers on an individual activity basis. Contact us today to see how we can create a custom education solution for your organization or offer education credit for your current activities.

### We Specialize in Performance Improvement CME

The Altarum model of CME is proven to result in measurably improved physician performance and patient outcomes.

Performance improvement-based education is a participative skills-building model of CME resulting in vastly improved and measurable patient outcomes. Working with Altarum, the health system, practice, or physician identifies areas in their practice where they see a need for better outcomes in their patients through more appropriate and effective treatment protocols. Areas of improvement are identified, and a curriculum is created to address the perceived practice gap. Altarum assigns clinical professionals to each clinic or practice to guide learners through the program and act as resources on a regular basis. By completing two linked cycles of a data-guided Plan-Do-Study-Act protocol, healthcare professionals learn and apply new strategies and treatment options on their patient population and report the results to measure their progress and return on investment. Eligible participants of our quality improvement programs earn 30-50 Performance Improvement *AMA PRA Category 1™* credits and 20-25 MOC Part IV Improvement in Medical Practice credits.

### Our Quality Improvement CME Programs

Clinicians can participate in one of four programs Altarum has already developed. The existing quality improvement programs offer both *AMA PRA Category 1™* credit and MOC Part IV credit for board certified physicians. These initiatives are aimed at strengthening early identification and reducing the prevalence of 1) childhood dental disease, 2) opioid addiction, 3) depression, and, 4) appropriately identifying and treating patients with trauma. Our programs are designed for clinicians as well as health professionals in non-clinical settings. If your organization has specific areas of need, please contact us to discuss how we can design a custom solution to guarantee greatly improved outcomes in your patient population—quality improvement initiatives are our specialty.
