

Ultimate Access

Complete command of data – Here. Now.

Actionable from Anywhere.

Vcinity puts critical data in reach, no matter where in the world it resides. Our patented solutions create a federated environment where users have unbounded access to content across their enterprise — so they can share and innovate in transformative ways.

Our products seamlessly integrate with your infrastructure. They bring together storage, cloud, compute and work sites on a unified data platform — allowing teams to collaborate on remote data in real time, as if it were local.

Vcinity’s solutions access data remotely and keep it in-place. You don’t have to move your data — ever. But if needed, you can move terabytes to petabytes at unmatched speeds, over any distance. The choice is entirely yours! Your operations can now continue at the pace of business with less risk and lower costs.

Reimagine What is Possible NOW

Leverage complete remote datasets in-place for analytics/AI/ML engines

Live editing of content without needing to move it

Enable new workflows not possible before

Connect on-prem data to colo or cloud with full control of data

Dynamically rotate workloads into private or public clouds

Near-zero RTO with greatly improved RPO across any distance

Dramatically reduce copy sprawl

Improve data security with drastic

The Ultimate Strategic Advantage

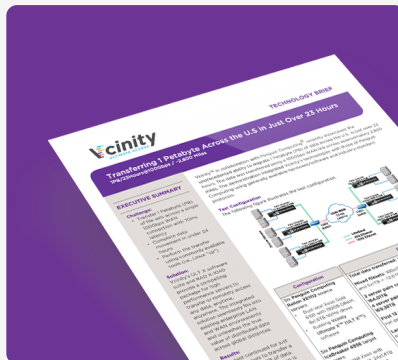

Vcinity helps you transform your organization's data into a strategic advantage.

By making the right data readily available to more people, you can accomplish more with the assets you have. As a result, you're empowered to make better decisions, speed your time to revenue, and operate as a truly resilient digital enterprise.
