Your Prediction:

Volcanism

Drag each pin onto your prediction of where a region of volcanic hazards exists

Area 1

Area 2

Area 3

Volcanic eruptions occur when liquid rock (magma) reaches the surface. Highlight the areas where you think volcanic eruptions typically occur on Earth. Think about news events, your own experiences, or even places that come to mind when you think of volcanoes, like Hawaii or Iceland.

Guide to Choosing Your Next Online Learning Platform

Everything you need to know when choosing the right platform to create amazing online courseware.
