

 (cyclosporine ophthalmic solution) 0.09%

CEQUA™ is also available at your local pharmacy

You can get CEQUA at retail pharmacies. However, CEQUA is also available at a lower cost if you have it delivered through **Cequa Support™ Pharmacy**.

Steps to get started with CEQUA

1. Your doctor **will give you a prescription for CEQUA** or send it to your retail pharmacy of choice.
2. **Click here to activate copay card**, then download or print the card.
3. **Bring the copay card** to your local pharmacy to receive the discount.

WHAT IS CEQUA?

CEQUA™ (cyclosporine ophthalmic solution) 0.09% is a topical solution that helps to increase the production of natural tears in your eye. Dry eye disease may affect the ability of your eyes to produce its own tears.

IMPORTANT SAFETY INFORMATION

Do not use CEQUA if you are allergic to any of its ingredients. Be careful not to allow the vial tip to touch your eye or any surfaces, to help avoid potential eye injury or contamination of the product.

CEQUA should not be used while wearing contact lenses. If contact lenses are worn, they should be removed prior to using CEQUA and may be reinserted after 15 minutes.

Put one drop of CEQUA twice daily (approximately 12 hours apart) into each eye using a single-use vial. The solution should be used immediately after opening, and discard the vial and remaining contents immediately after using.

The most common side effects that may be experienced while using CEQUA include: eye pain after administering drops and eye redness. Other side effects reported were eye irritation, eyelid inflammation, headache, and urinary tract infection.

You are encouraged to report negative side effects of prescription drugs to the FDA. Visit www.fda.gov/medwatch or call 1-800-FDA-1088.
