

SOFTWARE ASSET MANAGEMENT

License Optimization to Reduce Spend and Compliance Risk

This is software and IT asset management scaled for enterprises. Let us show you how better license management can save you money and time through software license optimization. And how you can manage your vendor relationships and contracts more efficiently for better results.

Flexera FlexNet Manager software and IT asset management solutions manage and optimize enterprise software regardless of location, from the desktop to the data center to the cloud. We'll give your organization a growth path and roadmap for success. Manage and reduce spend on applications from Adobe, IBM, Microsoft, Oracle, VMware, Symantec and SAP.

Key advantages to software and IT asset management

- Manage and optimize the most complex multi-vendor software licensing challenges
- Integrations with leading ITSM vendors

4 POWERFUL SOLUTIONS

For Clients

For Data Centers

For SAP Applications

For Engineering Apps

FLEXNET MANAGER FOR CLIENTS

Optimize your software licenses across desktops, laptops, and other client devices. FlexNet Manager for Clients automatically applies product use rights acquired through software license agreements from desktop vendors such as Adobe, Microsoft and Symantec. Product use rights can dramatically affect the number of licenses consumed by an organization, and must therefore be considered to minimize costs and ensure license compliance.

Now you can:

- Optimize license consumption to reduce software costs
- Increase capacity to proactively manage and track software license compliance

Chat with an Expert

- Increase capacity to proactively manage and track software license compliance
- Reduce risk of unbudgeted true-up expenses
- Improve vendor negotiations with better visibility and forecasting
- Reduce software maintenance spend
- Track application usage to reclaim licenses, optimize renewals and reduce denials of service

Key advantages:

- Industry-first 'What If' analysis capabilities that allow organizations to see the impact of hardware and software changes on their license position before the changes are made
- Includes the extensive content of the Application Recognition Library with recognition rules to identify software—including publisher, title, version, and edition—for more than 283,170 software titles from 17,471 publishers across multiple platforms
