### SpekLED™ Engines

Fusion Optix is redefining the way custom LED light engines are conceived, designed and manufactured. Our in-house team provides specialist support in optics and LED lighting product design as well as expertise in the latest LED packages, connectors and drivers. Fusion Optix has been designing and producing LED boards since the early days of LEDs in LCD backlighting. Our team can select from the best available suppliers (Nichia, Luminus Devices, LG, Seoul, Samsung, Cree etc.) and optimally match LED choice to application requirements.
