READ TECHNICAL DATA SHEET PRIOR TO USE

CONGELZ® Waste Water Solidification is designed as an environmentally-friendly solution for disposal of rinse water from masonry or other cementitious concrete projects. Simply add the product to your rinse water, allow to gel, and toss the works in the trash!

**DIRECTIONS:** Place a plastic trash bag into a bucket or pail. Clean the tools over the bag and into the bucket to collect all the rinse water. If cleaning a small container with waste still in it, place some water into the container and rinse with a brush or sponge. Dump all the rinse water into the bucket or pail with the liner bag. Add 4 oz. of CONGELZ for every 1 gallon of rinse water/dirty. Adding more powder will cause the rinse water to gel faster. Stir it gently with a stick and allow the waste to gel. Once the material has gelled, tie or fasten the bag with a twine before placing the bag in the trash.

**CLEAN UP:** Excess product can be cleaned with water before product has dried.

**APPROXIMATE COVERAGE:** 1 lb. treats 20 gallons (75.7 L) of rinse water.

.....  
**CONGELZ® CONTAINS SODIUM POLYACRYLATE, CROSSLINKED, AND PROPRIETARY INGREDIENTS**

**FIRST AID:** If inhaled: Remove to fresh air. If not breathing give artificial respiration. If breathing is difficult, give oxygen. Contact physician. If in eyes: Flush thoroughly with large amounts of water for at least fifteen minutes. If irritation persists, consult a physician. If swallowed: If adverse conditions appear, consult a physician. If on skin: Wash skin with soap and water.
