## DISCOVERY

from \$9,650.00

Building on the Explorer platform, we wanted to build another line of commercial mowers with speed and agility in mind. The DISCOVERY is just that, a very quick commercial mower. Kawasaki 850v engines power the DISCOVERY series, while HYDRO GEAR ZT-4400 pumps help to move this mower. Our 16 gallon fuel system will make sure that you will spend more time cutting and less time at the trailer filling up your tanks. With 54" and 61" deck options, you will be able to tackle any sized job both quickly and efficiently.
