MAXTRACT™

The MaxXtract™ System is up to a 1000 pounds per hour fully automated, closed loop, chilled alcohol extraction system, designed for maximum extraction of plant essentials with the least amount of plant damage. Our solvent extraction system utilizes multi-tank design with centrifuge technology to drive 99+% solvent recovery while maintaining a low solvent to plant matter ratio. Dwell time and temperature are controlled to create tincture, and ultimately oil, with select plant essential properties.
