

## STERAMIST® & BIOLOGICAL RECOVERY

When it comes to forensic restoration and the cleanup of biohazardous events, traditional disinfection and decontamination methods can only go so far. Your goal is to mitigate and recover from biological threats and crises.

### STERAMIST® CAN HELP.

Critical jobs such as trauma cleanup and emergency outbreaks require rapid response, and iHP™ technology delivers with thorough efficacy.

- Leaves no residues, and no wiping or rinsing is required.
- Bleach and chlorine-free disinfection formula.
- Sole active ingredient of hydrogen peroxide, and does not contain particulates, minerals, dyes, fragrances, or metals - including transitional metals, such as silver.

#### FRST COMPLIANCE

- Occupational Safety and Health Administration (OSHA)
- Environmental Protection Agency (EPA)
- National Institute for Occupational Safety and Health (NIOSH)
- Department of Transportation (DoT)
- Medical Waste Disposal Licenses
- And many more...
