

COMPLETE CLOUD  
UTILITY BILLING

# Kumo is a cloud native, 100% serverless architecture, utility billing CIS delivered to you entirely from a web browser.

With a simple, clean and intuitive approach, Kumo redefines the utility billing process. Say goodbye to your on-premises solution and stop relying on a local server, unreliable backups and other infrastructure worries. Kumo automatically scales to your business needs with availability, security and backups all taken care of for you so that your utility is operational at all times.

## Kumo can be integrated with other systems needed by utility companies including...

meter reading, payment processing, financial and asset management and outsourced bill printing. With Kumo you can choose your own vendors and not be limited to traditional CIS vendor partnerships.

No contracts, no hassles, unlimited support

Subscription pricing, system improvements at no additional charge

Built on the Microsoft Azure platform

25¢

Starting at just 25 cents per meter per month

Kumo is backed by Transaction Warehouse, a company that has been providing payment systems to utilities all across the country for 10 years.
