qwire

Qwire® creates collaborative solutions for clearing and licensing music, managing origial score, and cue sheet reporting

Qwire's mission is to create an end-to-end solution for everyone involved with music post-production for film, television, marketing, and other media. Qwire's products automate workflow, streamline processes, and provide robust tracking and reporting.

qwireClear

the most advanced solution for music clearance & licensing

qwireClear manages the end-to-end music clearance process process ("licensing-in") from the moment a song is chosen through to creation of license agreements and the payment of fees.

qwireCue

the next generation cue sheet reporting & management software

qwireCue streamlines music cue sheet management and reporting, simplifying importing and manual entry of cue sheet data and providing comprehensive reports for analysis.

qwireTracks

the best source for music ownership information & metadata

qwireTracks contains vetted rights holder information and other metadata necessary for music clearance and cue sheet reporting, reducing the time needed to research music rights. Access to qwireTracks is included with all Qwire products.
