qwire

Qwire creates collaborative cloud–based solutions for music clearance, licensing, and reporting within the music synchronization business.

qwireClear

A centralized management tool for music licensing and rights clearance

- **Streamline your music clearance process** by replacing in-house or 3rd party software, or by implementing a system where none existed before.

- **Improve efficiency and protect revenue** by eliminating the fragmented tracking methods that result in lost revenue, wasted costs, and potential legal liabilities.

- **Reduce clearance time** by automatically generating quote requests, approvals, and license transmittals.

- Get **real-time analysis** of budgets and clearance status on a per-project basis, and **enhance negotiation** with instant access to historical data from throughout your company.

- **Improve communication & collaboration** by getting your team working from a single source of information, and eliminate antiquated, inefficient, decentralized, and paper-intense processes.

- **Simplify cue sheet creation** by sending information about licensed music directly to Qwire's qwireCue cue sheet management and reporting tool.
