Spend management simplified

01 Buy

Automate and simplify purchasing. Fraxion electronically manages request creation, quoting, approvals, purchase order generation and the processing of invoices.

02 Claim

Streamline the submission of expense claims and ensure compliance with corporate policies while simplifying and speeding up reimbursement processes.

03 Invoice

Automate and control the entire accounts payable process, link invoices to orders and requests to approve invoices with ease and eliminate overpayments and duplicate invoices.

04 Travel

Streamline and control the entire process for travel: from request creation through to the processing of invoices, the generation of travel itineraries, acknowledgement of travel expenses incurred and the processing of invoices against travel costs.

05 Analyze

Analyze spend across all expense types, suppliers and users, view budgets and gauge the impact of expenditure before it is incurred. Fraxion's user-friendly business intelligence tools help you to manage risk and track expenditure at a granular level and identify savings.

06 Optimize

Optimize your business spend and operations. Accelerate your workflows, achieve paperless efficiency and purchase at the lowest price. Time and cost savings will boost your bottom line.

Scalable savings

“We were able to start with the system with only 10 users and it has easily scaled with us to almost 400. It’s allowed us to save at least 4-5 jobs in purchasing.”

Brad P, Materials Manager
Biofire Diagnostics
