

PROPOSITIONER

SHARE

The ProPositioner is an automated ABX-PRO (ProDrive) indexing device designed for portability and versatility at a cost-effective price.

The system is engineered to mount to an exchanger face with a single point of contact for quick set-up and will articulate in a radial motion from its connecting point. It is intended to allow the user to attach the device once and clean all tubes in most bundles without re-mounting.

The ProPositioner is an automated indexing device for single-lance tube cleaning designed for portability and versatility at an entry level price.

FEATURES

Lightweight, compact and portable – all components weight under 35 lbs (16 kg)

Quick set-up with a single attachment point, push-to-connect hoses, and quick clamps

Ideal for cleaning small exchangers, 40k psi (2800 bar) flex lance work or reactor cleaning

Optional accessories include a shotgun mount for surface prep and a mounting kit for domed bundle cleaning

COMPATIBLE WITH: **PRO**
