DEFY

The most advanced carbon fiber shaft ever.

DEFY tradition.
DEFY deflection.
DEFY vibration.
DEFY from McDermott.

DEFY HIGH-PERFORMANCE CARBON FIBER SHAFT

Introducing Defy — a shaft that defies the stereotype of carbon fiber shafts. Defy gives you the unparalleled accuracy and control that you expect from carbon fiber, but uses state-of-the-art technologies to shatter its limitations. SmacWrap, originally designed for the aerospace industry, absorbs vibration and dampens noise resulting in a confident hit with a soft feel and quiet sound. Our super-smooth coating reduces friction, allowing the shaft to glide through your fingers with ease like a wood shaft. Only Defy's insane energy transfer and accuracy will remind you that you're using a carbon fiber shaft. *Patent pending.*

CLEANING INSTRUCTIONS

Defy carbon fiber shafts have a special finish that contains a slip agent. This helps keep the shaft slick and resists chalk, dirt, and hand oils from soiling the shaft. For peak performance, you may periodically clean the shaft by wiping it down using only water on a lightly damp soft cloth. After the shaft is dry, apply Ultra-Glide Shaft Conditioner with a dry soft cloth to restore the smooth and slick condition.

As you continue to use the shaft, stroke friction will naturally burnish the shaft, resulting in a visibly smoother appearance. Never sand the surface as this will damage the special finish and void the lifetime warranty. Do not use talcum powder, baby powder, hand chalk, or any solid or liquid abrasives.

Defy Shaft Tip Replacement: Defy carbon fiber shafts are equipped with a 0.125" black ferrule. Because the shaft cannot be sanded, special care should be taken when replacing the tip. We recommend sending the shaft to McDermott Cue for proper tip replacement or use a service professional that has experience replacing tips on carbon fiber shafts.

OPTIONAL: After cleaning, use the **Ultra-Glide Shaft Conditioner** for added smoothness.

MSRP: \$13

**Above lead times are approximate and reflect production/processing time and do not factor transit time. All orders are subject to change. [Contact customer service](#) for more information on your order.*

Special Shipping Conditions

Orders shipped to **Hawaii, Alaska, Puerto Rico** or **Internationally** are subject to additional shipping costs. Additional charges will be calculated after order submission. Customs fees not included on international orders. The price shown in the cart may not necessarily reflect the correct shipping cost.

Most cue and/or case orders are shipped through UPS with a **signature required at delivery**. Most small accessory orders are shipped via Priority Mail and shipping totals will be adjusted to reflect that rate after order submission.

Restocking Fee

Returns are subject to shipping surcharges and/or restocking fees. [Contact customer service](#) for details.

Want to know when your order has been shipped?

Sign up for **UPS My Choice**. They will notify you when your order has shipped, as well as let you know the expected delivery date. Best of all, it's free!

Credit Card Purchases

Your "bill to" address must match the address associated with the credit card account. Additional charges may be applied to orders with customization. Your card will not be charged any additional amount without your consent.

Defy Carbon Fiber Shaft Official Discussion

by Andrew Bullis / in News / 19 Comments

Facebook Twitter Print Email More

Hundreds of pool players have tried our new **Defy Carbon Fiber Shafts** at events around the United States, and we're beginning to see photos pop up on social media from happy new Defy shaft owners.

If you've had the chance to try out a Defy shaft, if you're a proud Defy owner, or if you are anxiously waiting for the delivery truck to bring your new Defy, here's the place to discuss your thoughts. Let everyone know what you thought of it. How was the hit? How does the deflection compare to your other shafts? Why did you decide to purchase one?

Add your comments to the discussion below! Be sure to check back to see the latest comments.
