The Challenges of Agile Software Development Costing and Capitalization

Overcoming A Critical Barrier to Scaling Agile Success

Agile costing and software capitalization are a mystery for many organizations. Some finance teams prefer timesheets to track actuals, others give in and expense all Agile related work. To truly understand the impact Agile development has on the bottom line, Agile and finance leaders must discuss and agree on how to fund, budget, and manage the costs associated with Agile development work or face the consequences of a stalled Agile transformation.

Download "The Challenges of Agile Software Development Capitalization" eBook, to understand:

- Why Agile costing is important to capitalization
- How capitalization impacts Agile team funding and headcount
- When Agile software development capitalization starts and ends
- How time tracking impacts capitalization
- Why costing by values streams enables better capitalization
- How Planview can automate actuals for Agile teams

Both finance and Agile development leaders will learn how to evaluate Agile software development efforts and why defining capitalization rules are critical for scaling Agile success and quite possibly the future of your organization. Get the eBook now!
