What Makes Status Revolutionary?

Status is the only compliance program technology that makes it easy to automate and centralize functions of your compliance program. And because compliance is transformative in nature, Status is continually evolving with changing regulations, technological advancements and client feedback. Features include:

End-to-end third-party due diligence management

Pre-configured integrations and APIs

Automation engine

Custom workflow

Report automation

Innovative, first-of-its-kind industry report sharing

Significant in-house research capabilities on four continents

Industry-leading data security

How Status Benefits You

Third-Party Compliance, Made Simple

Status, through an easy-to-use interface, helps monitor thousands of companies, per day, ensuring that you learn about significant risks as they rear their ugly heads. Automate, interact with external partners and manage approvals.

Unparalleled Visibility

Status makes it easy to capture a comprehensive view of risk, all in one place. Effortlessly pull together information from third parties, due diligence, your business units, procurement, compliance and legal.

Absolute Flexibility

Status is fluid and adapts to your company's existing systems and processes. It is integrated into your workflow, your specifications and how you do business. Extremely scalable, Status is purpose-built to support lean or global compliance teams.

Nimble Automation

Without the need for extensive programming, our robust automation engine can be rolled out quickly. Standardization and automation drive down costs, create new efficiencies and enable your compliance people to be more productive.

Connect Your Data

Seamlessly integrate Status to the other systems you currently use, including CRM, ERP and vendor management. Our secure APIs instantly sync data across systems, saving countless hours of redundant, manual work.
