ABOUT US

Rush Seeds™ equips farmers to conveniently buy corn and soybean seed options that result in high yield crop opportunities!

Rush Seeds™, a new highest quality seed brand, is available in select Indiana and Ohio counties in 2020 exclusively through our web commerce partner, Online Seed Sales. We operate out of our Rushville, Indiana facility.

Rush Seeds™, builds on the legacy of Denzler Seeds, Inc., a thriving Independent seed company that has served farmers since 1986. Buy seed corn and soybean seed with confidence from a family business with decades of service to Indiana and Ohio farmers.

- **Convenient**
Investigate on your schedule Rush Seeds™ high-performance genetics and traits. Fill your cart with your www.onlineseedsales.com purchase. Anticipate Rush Seeds™ to personally deliver your seed to your farm.
- **Options**
Rush Seeds™ recognizes that your farm is unique. Manage your profit goals in the manner that works for your farm. Match our seed options to the herbicide program and marketing goals you have on your acres.
- **Equip**
Easy website look-up equips you with what you need to confidently make an informed decision for your seed. We also attach our 3rd party lab report and a product sheet on each lot we ship you. Confidently, you can go to the field knowing the germination details and the product placement notes for the seed you buy.
- **Results**

PRODUCTS

Our product lineup provides seed options for your farm. Options are a result of Rush Seeds™ being an independent seed company. Instead of offering one trait platform from one germplasm pool like the multi-national brands, we access the world's leading traits and germplasm from multiple sources. We select our products for Indiana and Ohio soils. Our geographical specific options allow you the best choices.

We provide traited and Non-GMO seed corn options for the conventional grower. Our soybean lineup includes conventional, Glyphosate, GTLL and new Enlist E3 varieties.

Farmers manage inputs, insects, and weeds differently. Your seed decision is complex and unique to your goals. Our portfolio of seed options recognizes this. Rush Seeds™ equips you with the product options and information you require to make an informed, confident seed decision for your fields.

Corn

The Rush Seeds™ corn hybrid portfolio was developed with the assistance of multiple national and international breeding programs. It includes conventional corn hybrids and traited corn options. At the beginning of the development process, there are 10's of 1000's of replicated plot data points, predictive...

Soybeans

Rush Seeds™ is delighted to introduce high yielding soybean options that are value priced for your farm. Our convenient, no-frills approach not only saves you money, but our outstanding lineup make you bushels! Non-GMO soybeans earn grower premiums. Rush Seeds™ GT lines are value priced...

PRODUCTS

CORN

- Conventional Corn
- Glyphosate Corn
- Trait Protected Corn

SOYBEANS

- Conventional Soybeans
- R1 Glyphosate Tolerant Soybeans

OPTIONS

President, Mark Denzler of Rushville, Indiana based Denzler Seeds, Inc. announced the launch of Rush Seeds. Rush Seeds, a wholly owned brand of Denzler Seeds, Inc. will operate from their Rush County, Indiana location. Rush Seeds is exclusively available through the web-based ordering platform, Online Seed Sales. In their 2020 inaugural year, Rush Seeds will offer 15 corn hybrids and 15 soybean varieties. Corn options will include conventional and traited hybrids. Soybean options will include conventional, glyphosate, GTLL and Enlist E3 varieties.

Stout Seed is a family owned company founded by farmers, run by farmers and makes decisions solely with the farmer in mind. Our vision is simple: create opportunity for farmers to have access to the best genetics, at the best prices, all while promoting stewardship practices that reach further than our immediate community. Partnering with Stout Seed gives you access to a company that puts you first, because "you are us" and "we are you."
