

You need clarity, confidence, and the right tools to take charge of health outcomes

Where were we six months ago? Where are we now? You have different tools for different purposes, but none that log the progress of changes in the health profile making it what it is today.

Track changes in your health history

Keep personal preferences up to date in the "All About Me" module. Record updates and view a history of changes for allergies, foods enjoyed, insurance plans, skills, sleep habits, things to avoid and many more.

Record, analyze, and make a difference

Log an array of entry types from bathroom visits, behaviors, exercise, moods, symptoms, seizures, and more. The more you log, the more you can discover with our analyzing tools. Compare and contrast entry types, find patterns, and have a greater knowledge about your health. Help your doctor help you.

Stay on top of daily health regimens

Your Maya dashboard lets you keep track of an array of daily and weekly aspects of a health profile. From viewing a daily snapshot of bathroom visits, hydration levels and hours slept to medication, appointment and birthday reminders.

Support the entire family

Maya can be used for yourself, and your entire family. Each health profile contains its own set of logs and modules that are easily customizable in the caregiver dashboard.
