

Corza Health partners with healthcare and life sciences companies to help them accelerate growth, achieve market-leader status, and expand equity value. To accomplish this, we apply a unique, multifaceted strategy that entails:

- Sourcing and placing exceptional leaders within an organization
- Driving operational efficiencies through the utilization of key performance indicators and other, proprietary methods
- Ensuring that appropriate corporate governance, risk management, compliance, and controls are established and properly monitored
- Establishment of an M&A function fully supporting buy- and sell-side transactions as well as public exit opportunities
- Provision of growth capital to execute transformational investments

Our key partner in this endeavor is leading private equity firm GTCR, pioneer of [The Leaders Strategy™](#). Representing an important complement to Corza Health leadership's own expertise and extensive network of experienced and established leaders in their domains, Leaders Strategy™ teams offer accretive industry insights, informational advantages, and a talent pool which can be leveraged in support of our portfolio companies.
