Better than my Otterbox

I was unhappy with the design of my otterbox case and was happy to find a more intelligently designed and capable case that holds up to 5 credit cards rather than the standard 3. This has been the best case I've ever purchased and never seems bulky which is an impressive achievement.

Solid Case with built in storage

Great case. Has saved the glass twice when dropped hard. Easy access for credit cards/ID. Recommended.

Wish they would create this case with a battery charger

I love this case - I can easily hide my credit card and drivers license and not have to worry about the glue for the credit card holder falling off or someone seeing my information. The only downside is I need a case that has the extra battery charger and I wish someone would come up with a battery pack + credit card slide holder like this. I would pay extra for it!!
