Install

Audeze HQ is the companion app for Audeze Reveal+ plugin. Aural Map technology provides personalized spatial profile that's Crafted for your Ears™ by Embody™

In order to use the Aural Map Feature in the Reveal+ plugin, just take a photo of your ear with the Audeze HQ app. Embody's machine learning algorithms create a unique spatial profile based on the physiology of your ears. This profile, or Head-related transfer function (HRTF), is then downloaded directly to your Aural Map on Reveal+.

Please note that this app does not support the Audeze Cipher cable.
