 **IMMERSE** Powered by Embody FOR **logitech**  TM

**LAPTOP**  
part of *laptops guide*

“ ...Rancorous battle scenes, nearby feet hitting the pavement and the vroom-vroom of the racetrack are sounds that will grace your ears in a whole new, innovative way ”

- Kimberly Gedeon, Laptopmag

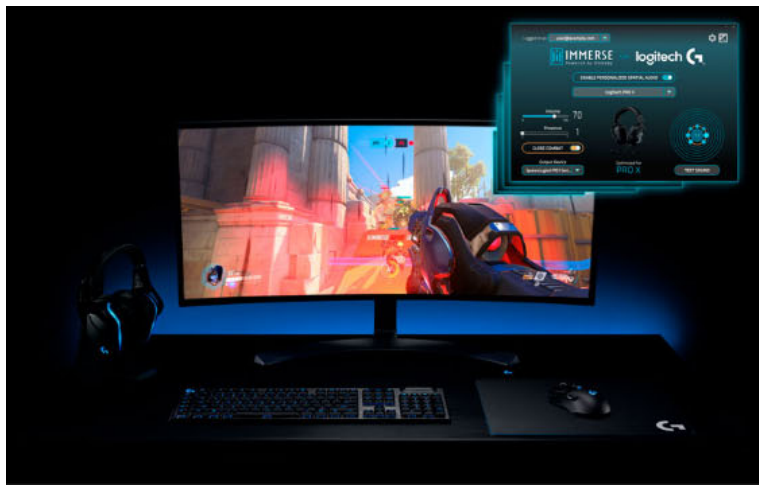

**HEAR IT FIRST.  
HEAR IT ALL.**

Immerse is a revolutionary new audio technology developed by Embody for passionate gaming and music lovers alike. Immerse is a personalized spatial audio technology that utilizes Artificial Intelligence (AI) to create a custom Head Related Transfer Function (HRTF) profile from a single image of your right ear, optimizing sound just for you.

With Immerse, you hear game audio as you hear sounds in the real world. Gone is the hesitation to take a shot because you know exactly where your enemies lie. Immerse delivers sound that is uniquely crafted for you, by evaluating the abstract features of your ear to create a sound profile that simulates how you hear the world around you.

## Audio Tactical Advantage

Immerse paired with the unique and powerful PRO-G driver in Logitech G headphones, makes you feel as close to being in the game as possible. Logitech G headsets faithfully reproduce the in-game sound and Immerse customizes the Logitech G hardware to create a distinctive sound optimized for your individual ears.

**Close Combat Mode:** An option that in a single click or with a hotkey (ALT+4) collapses the Presence setting from your current setting to 1. This enables you to hear the action closer to you, making the sound of a well timed attack or a close reload easy to identify.

## Personalized Spatial Audio

With Immerse™, you hear the precise location of enemy footsteps and reload sounds; you have the advantage of hearing your enemies before they hear you. It increases the engagement factor by significantly improving the alignment of visual and audio cues.

Immerse achieves this by harnessing the power of cloud computing and artificial intelligence to deliver truly immersive sound experiences uniquely crafted for your ears. Through an intuitive process of capturing your ear image, Immerse creates your personalized spatial audio profile in under a minute and delivers the sound your ears are meant to hear.

## Compatible with Logitech G and PRO Series Gaming Headsets

Bring Individual form and Personalization with Immerse on your favorite Logitech G and PRO Series Gaming Headset
