

## Welcome To Your New Smart Home

We couldn't be happier you chose us to help bring your home towards a brighter future. Before we open the rest of the box and explore all your new equipment, we need to power up your new Touchscreen Panel.

### Where To Place Your Panel

Anywhere central in the home that's easily accessible and close to a power outlet. Avoid placing it right next to the home's entry/exit.

Typically, it should be placed on a table, countertop, nightstand or a shelf.

### Locations To Avoid

Within 5 Feet Of:  
Refrigerator, Microwave  
TV, Washer/Dryer  
Large Electronics/Metal

These interfere with the wireless signals sent by your sensors and Panel.

### 1 Plug In Your Touchscreen Panel

### 2 Turn On Your Touchscreen Panel

Press For 5 Seconds
