

Got Covers?

mVibe is the go-to platform for sourcing cover songs for sync. Utilizing state of the art technology and superior metadata, mVibe helps ad agencies, film & TV music supervisors, and other creative media professionals find and license cover recordings, re-records and other versions of current and classic hit songs.

Whether you are an artist or a label, if you have cover music mVibe is absolutely the best place to showcase you songs for sync licensing. We have become the go to source for cover music for sync projects. Music supervisors, coordinators and agencies all look to mVibe for the best selection of cover music for advertising, television, films, trailers, video games and more. Our powerful search and hand curated metadata will showcase your music for just the right placements. mVibe handles the collection, administration and payment of sync royalties on your songs to leave you more time to create new ones.

Benefits of mVibe:

- The most powerful search helps your covers get found
- Expert team of licensing professionals with decades of experience help you get the best rates
- The perfect combination of AI and hand-curation of metadata make your songs easy to find
- Non-Exclusive deals mean we will ADD TO the money you make

What are you waiting for? Let's get started today!

Get Started!

For Artists.

Are you an artist or band who has recorded cover music? It can be tough to be an independent musician, and even hard to find sync placements. Sending your music to music supervisors or agencies is often a black-hole. You have good covers but it is almost impossible to get them in front of the right people at the right time. Let mVibe help!

Reimaginings? A dark, haunting cover of today's chart topper. Or maybe a big band interpretation of the classic rock favorite. Or maybe a refresh of that obscure folk song. We get searches every day for new interpretations of songs by supervisors looking for something different.

Sound-alikes? No problem! Supervisors are often looking for a copy of a cover they know they can clear easily. For the right track and circumstance they may even be willing to pay more than the original recording.

Re-Records? We have that covered too! We have already compiled one of the largest libraries of re-records in the industry. It does not matter why you decided to re-record the master. For better sound, more control, or lost original. Whatever the reason, let mVibe help you find the perfect placements for your work.

Hundreds of verified users perform tens of thousands of searches each week, looking for that perfect cover for their scene. What are you waiting for? Let's get started today!

Get Started!

For Labels.

It does not matter if you are a small indie label with 20 covers, or a huge operation with hundreds of thousands of covers. We can help you increase your sync revenue. Our users and expert licensing team are always looking for new catalogs.
