## Floors for Multipurpose Rooms & Multiactivity Sports Areas

Choose from a Variety of Quality Multipurpose Sport Court Floor Options

When considering a new floor for your multipurpose room, it's important to consider all of the activities conducted in the space, what features they might require in a floor, and what kind of stresses and wear they will inflict on the floor. With your flooring needs and however varied your athletic activities, please contact one of our certified sports flooring experts NJpreferredservices@gmail.com are here to help you find the ideal solution.

SignaWood premium sprung flooring is the perfect floor for just about any athletic pursuit. Optimum shock absorption, vertical deformation, and ball rebound will contribute to your athletes performance. This environmentally friendly hardwood flooring installs faster and lasts longer than traditional maple flooring.

SignaFlor pad and pour flooring creates an economical and visually impressive seamless gym floor without compromising durability or quality. The SignaFlor system is installed by our experienced pad and pour flooring installation team and offers consistent ball bounce, shock absorption, coefficient of friction, and is easy to clean and maintain. Vibrant pad and pour flooring color options allow for customization to match your team or corporate colors.

SignaFlex rolled vinyl flooring presents the appearance of real wood, with a few added features not present with traditional hardwood gym floors. The polyurethane coating resists dirt build-up and contains an anti-bacterial agent while providing optimal slip resistance. This cost effective gym flooring product does not compromise consistent ball bounce, shock absorption, vertical deformation, or coefficient of friction. Available in a variety of simulated wood finishes and lightly textured vibrant rolled vinyl flooring colors.

TrackDeck rolled rubber flooring is a great choice for gym floors. Available in three thicknesses to suit your particular needs, these elite rolls provide excellent force reduction and ball rebound. Choose from six standard rubber flooring colors or ask about custom color options.

RubberDeck is a durable flooring option for multipurpose areas that is easy to clean and maintain. Made from recycled rubber tires, this Earth-friendly flooring can withstand heavy traffic and helps to absorb sound. Available in three varieties: 48" rolled rubber flooring, 24" square interlocking Puzzle Tiles, and raised 24" square Super Tiles that allow cables and electrical cords to run underneath. With several colors to choose from and numerous custom options, RubberDeck dent-resistant flooring is a versatile choice for your multipurpose areas.

TrackDeck is a high quality, durable rubber flooring product, available in 8mm, 10mm, and 12mm thick rolls. This product is extremely versatile, environmentally friendly, and easy to maintain. Choose from 6 standard colors, or create a custom color to match your facility decor.

SignaDeck and SignaDeck Premium rubber tiles are our most durable and versatile flooring products. Resistant to wear, slipping, spikes, chemicals, and even burns, these floors are available in 3mm or 5mm with optional recycled rubber underlayer for added shock absorption. Ideal for high traffic and mixed use areas, SignaDeck and SignaDeck Premium are engineered to withstand repeated battering of athletic activities and heavy static weights of equipment and machines. Available in 17 exciting colors with decorative EPDM flecks.
