## HOW TO CLEAN SHOES | WOMEN'S SHOES

Our women's shoes are crafted to last forever. This makes it even more important to keep them clean. To clean the surface of the shoe, use some warm water and dishwashing detergent. For leather shoes, use vinegar or baking soda to remove residue. A toothbrush is handy for cleaning the edges of the shoe. Use a paper towel or a cotton towel to wipe the entire shoe, removing any leftover water and soap. Then allow the shoe to air dry before wearing with your perfect pair of jeans (of course).
