

**THIS CHANGES
EVERYTHING!!**

LamonsFASTTM (Field Acquired Seal Technology) is a process to turn undocumented gaskets in the field into new, manufactured gaskets with very little time and effort.

Our process of re-engineering gaskets saves time, money and is extremely accurate. Drawings are generated in under an hour from a simple photo on even the most intricate gasket designs.

Why is LamonsFASTTM a big deal?

No Expensive Travel or Shipping Necessary

Faster than the traditional process, even for complex gaskets

No Special Skills or Tools Required

Accurate and requires no expensive equipment

Saves Time and Money

Manufacturing files ready in under an hour
