**DESCRIPTION** +

Plant Baby™ shampoo and conditioner ingredients have #1 ratings according to the Environmental Working Group (EWG) Skin Deep safety analysis. This is important as a baby's skin is extraordinarily sensitive and is not happy being introduced to human-made chemicals at an early age. Popular "natural" baby hair products may contain essential oils, quaternary ammonium film formers, parfum, polyethylene glycols (PEGs) foam boosters, sodium hydroxide, mineral oil, phenoxyethanol, and more. Foam, fragrance, and silkiness are a sensory marketing strategy that employ chemicals in order to please the mother. Our 100 percent plant ingredient formulas are formulated to please the baby, designed to cleanse a small, precious human being.

**HOW TO USE** +
**Plant Baby Shampoo + Body Wash**

Place a small amount in hand and work thoroughly into scalp and roots. Apply twice if needed. This is a gentle shampoo. If you have excess sebum or oily hair, you may need to wash twice. Over time, our shampoos calm the scalp and only a single application will be necessary for complete and gentle cleansing.

**Plant Baby Conditioner + Lotion**

Apply and leave in hair for 2-5 minutes for maximum benefit. It can be used in place of shampoo or before you shampoo. Please discover the way that works best for your hair.

**INGREDIENTS** +
**Plant Baby Shampoo**
**WATER DEIONIZED/PURIFIED**

(aqua)
