Go Beyond the Classic 'Follow My Finger' Test

The FDA-cleared RightEye Vision System™ reveals eye movement patterns an observation-only exam cannot, to assist you in:

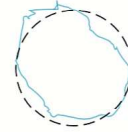

- Gaining a complete picture of your patients' vision
- Objectively identifying oculomotor impairments uncovered in illustrative test results and graphical reports
- Improving dynamic vision with online, at-home eye exercises tailored to your patients, under your supervision
- Growing your practice with enhanced vision care services to address your patients' reading skills and sports vision

IMPAIRED EYE MOVEMENTS

RIGHT EYE

LEFT EYE

A Solution With Many Benefits

Our Innovative Eye-Tracking Technology Can Help Your Practice!

How RightEye Fits into Your Office Workflow

RightEye was built to add revenue to your practice. The 5-minute assessment can be administered by anyone on your staff so you can focus on patient care while increasing the number of patients you see daily.

IDENTIFY

Identify at-risk patients via clinical observation or system intake form

TEST

Administer the 5-minute assessment by anyone on your staff

REVIEW

Graphical reports and norms illustrate areas of impairment

FOLLOW-UP

Prescribe treatment or assign easy-to-use follow-on oculomotor training

A Training Program to Improve Dynamic Vision

The RightEye [Dynamic Vision Trainer](#) was designed for vision care providers to address oculomotor impairments uncovered in your RightEye reports. The computer-based oculomotor training exercises:

- Improves a patient's dynamic vision with eye exercises tailored to an individual's area of oculomotor impairment, under the supervision of their doctor
- Enhances or supplements existing training programs

- Enhances or supplements existing training programs
- Can be self-administered online and at-home, allowing you to improve your patient's dynamic vision without the need for additional training or staff

The Perfect Vision Care Solution for Your Practice

Our core Dynamic Vision Module is the perfect solution for your vision care practice and includes:

[REQUEST A QUOTE](#)

- **VisionTracker2** — Research-grade eye tracking device, accessories, and warranty
- Core **Dynamic Vision Module** — Uncover and illustrate eye movement impairments through eight eye-tracking tests
- **Dynamic Vision Trainer** — At-home, online oculomotor training program you prescribe to help improve your patient's dynamic vision

- **Sports Vision Module** — Improve on-field performance by taking your athletes' vision from good to great
- **Custom Assessments & Individual Reports** — Customize patient exams to run only the tests and produce only the reports you select

YOUR SIGHT. OUR INSIGHT. SEE RESULTS.™

Providers Changing Patients' Lives with RightEye

Vision care providers just like you have built RightEye into their workflow and have seen an overwhelming response from patients and parents who have attributed RightEye to changing their lives.

"During the past fifty years, there have been just a handful of significant technology shifts in the eye care industry and RightEye is one of them. It adds a completely new dimension for vision care."

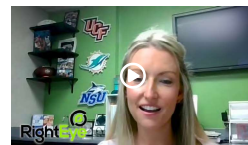

Dr. Kristopher May, OD, FAAO
Coldwater Vision Center

Adam Clarin, OD
Clarin Eye Care
Dr. Clarin is providing objective reports to help parents understand exactly what is happening with their child's vision.

Dr. Keith Smithson, OD
Sports Vision Pros
Dr. Smithson provides concussion baselines for athletes and uses those assessments as a benchmark for recovery.

Dr. Amanda Nanasy, OD
The Eye Center
Dr. Nanasy gives patients clear, trackable training programs to address visual dysfunction uncovered during her exams.
