Link Dynamic Vision to Everyday Wellness

Vision is the most dominant of all the senses. 80% or more of all information we acquire is through sight, and 90% of our brain function is spent processing tasks related to vision. Yet, a standard vision exam lacks the ability to assess vision beyond static acuity. The **RightEye core Dynamic Vision Module**:

- Transforms the traditional 'follow-my-nger' test into digitally tracked ocular movements
- Uncovers hard-to-identify eye movement impairments in real-time
- Creates **patient-friendly reports** with eye movement illustrations and video playbacks
- Improves dynamic vision with an **at-home training program**

Dynamic Vision Module Tests

The core Dynamic Vision module compiles eight eye-tracking tests into one assessment that measures:

Circular Smooth Pursuit

Horizontal Smooth Pursuit

Vertical Smooth Pursuit

Horizontal Saccade

Vertical Saccade

Fixation Stability

Choice Reaction Time

Discriminate Reaction Time

A Report that Quantifies, Illustrates, and Astounds

The core Dynamic Vision module produces a graphical, patient-friendly report that:

- Illustrates eye movements and vision tracking
- Tells a story of dynamic vision health
- Helps you evaluate your patients and recommend treatment
- Allows you to assign a customized training program for ongoing care

At-Home Personalized Dynamic Vision Training

The RightEye **Dynamic Vision Trainer** was designed to address the oculomotor impairment uncovered in your report without the need for additional training or sta . The Dynamic Vision Trainer:

- Produces programs to **address specific needs of individual patients**
- Can be completed **between in-office visits** on any computer or large-sized tablet
- Program **duration can be customized** depending on your clinical recommendation, with RightEye guidance provided
- Allows you to **objectively quantify patient progress** with in-office retests

The Most Powerful Lightweight in the Office

The **RightEye VisionTracker2** device is our research-grade, eye-tracking hardware included with subscription. The device is:

- The **first o ce-friendly, all-in-one solution** for vision-derived health testing, tracking eye movements and providing data to help you correlate them to health issues
- **Portable**, not much bigger than a laptop, works wired or wirelessly, and weighs in at less than 8lbs
- **Non-invasive** and can be administered by anyone in your organization in only 5-minutes

What Customers Are Saying About RightEye

Don't just take it from us, here is what a few of our customers think about RightEye!

Using the RightEye system with TBI patients and sharing reports with neurologists and pediatricians in the community has caused our referral business to skyrocket. They really appreciate the objective information, which makes it easy for them to see what the issue is. I love my RightEye!

Dr. James Deom, OD, MPH, FAAO, FSLs
Stroudsburg Eye Specialists

Adam Clarin, OD

[Clarin Eye Care](#)

Dr. Clarin is providing objective reports to help parents understand exactly what is happening with their child's vision.

Dr. Keith Smithson, OD

[Sports Vision Pros](#)

Dr. Smithson provides concussion baselines for athletes and uses those assessments as a benchmark for recovery.

Dr. Amanda Nanasy, OD

[The Eye Center](#)

Dr. Nanasy gives patients clear, trackable training programs to address visual dysfunction uncovered during her exams.
