Tired of special threads, slots and bumps that make connecting hoses to wet/dry vacs a "special experience?" So are we.

- Use virtually *any* brand hose with *any* brand wet/dry vacuum, including Ridgid, Craftsman, ShopVac, Vacmaster and many more allowing you to use an old hose system on a new vac
- Snugly fits 1-1/2" PVC pipe & fittings, which are good for hard plumbing power tools and a dust collection system in your shop
- Helpful for popular dust separator cyclones where you can't get any hose to fit without duct tape and a few four-letter words

## REVIEWS

Got an old Craftsman vac that died. Had a long hose, extensions and lots of other accessories for it. Was able to use that old hose system with my new

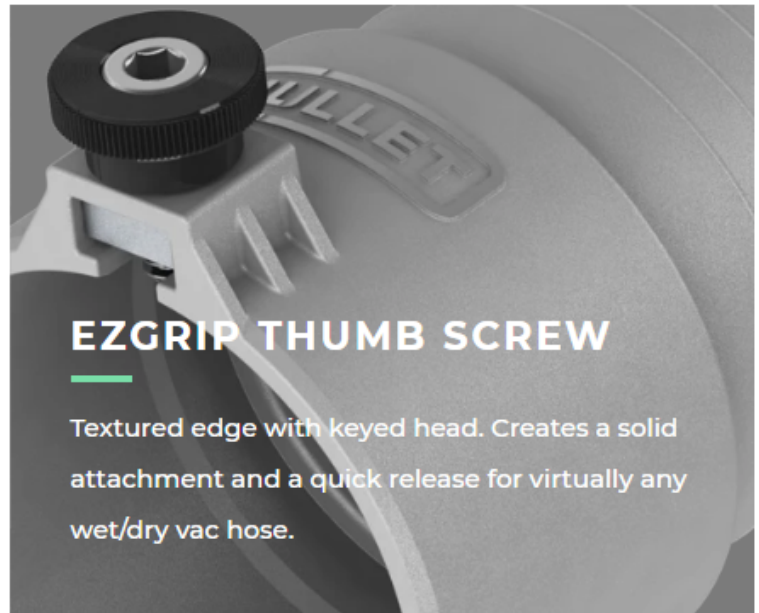

Got an old Craftsman vac that died. Had a long hose, extensions and lots of other accessories for it. Was able to use that old hose system with my new ShopVac. Saved a ton on accessories.

LUKE B.

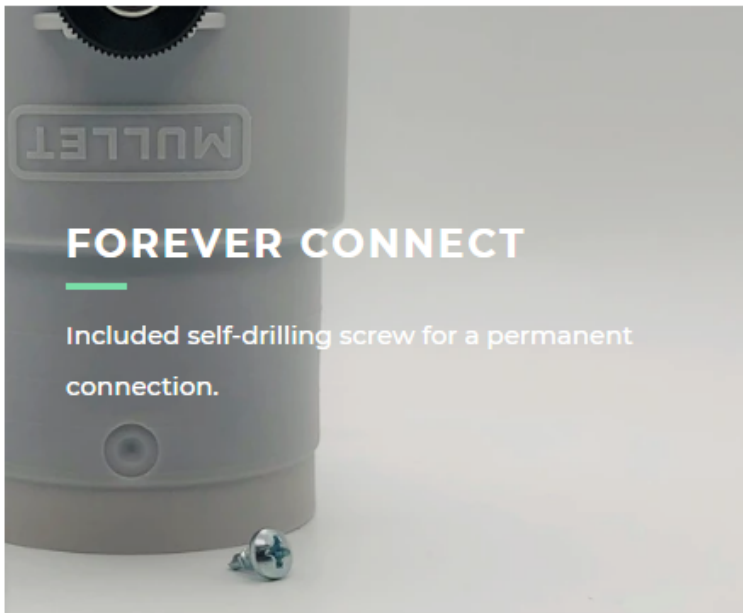

### STEPDOWN OPENING

Fits virtually brand wet/dry vac opening & hose.  
Also fits 1-1/2 PVC pipe & fittings found at home/hardware stores.

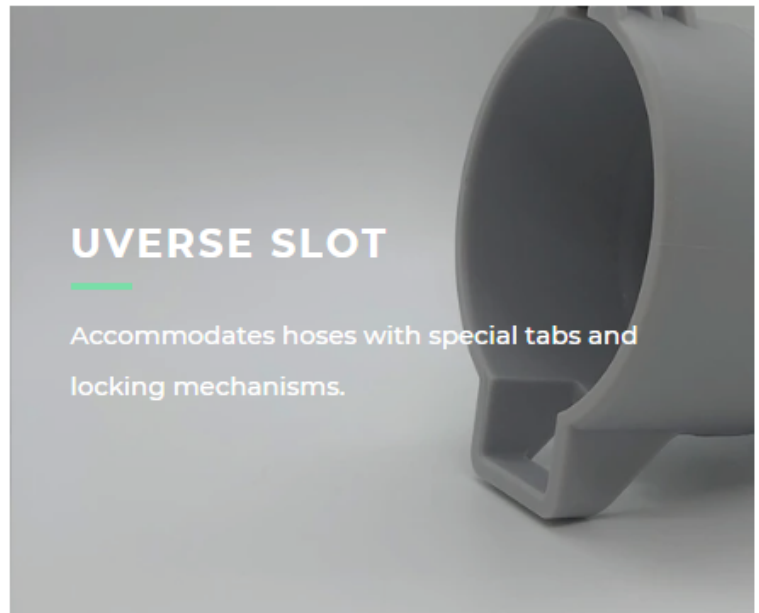

### EZGRIP THUMB SCREW

Textured edge with keyed head. Creates a solid attachment and a quick release for virtually any wet/dry vac hose.

### FOREVER CONNECT

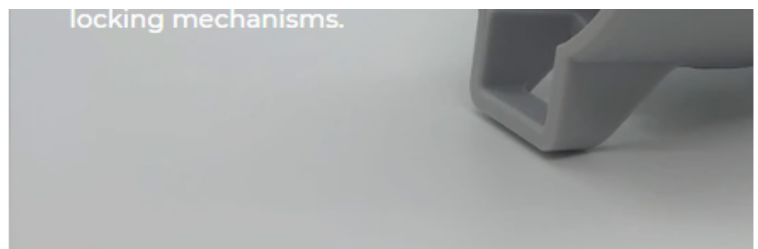

Included self-drilling screw for a permanent connection.

### UVERSE SLOT

Accommodates hoses with special tabs and locking mechanisms.
