Enabled for home or business use, this AcuRite Wi-Fi Wireless Weather Station has a professional feel at a personal price. The weather station remote sensor reaches up to 330 feet (100 meters) using a 433 MHz wireless signal. The best-in-class display allows easy and clear readability from almost any angle. The cleverly designed information center allows for maximum info without clutter.

Reliable and accurate weather data with hyper-local measurement.

Display requires 3 AAA batteries (not included). AcuRite Iris (5-in-1) Weather Sensor requires 4 AAA batteries (not included)

### Direct-to-Wi-Fi Display Features

- Direct-to-Wi-Fi sends weather information directly to My AcuRite through your internet connection
- Large font display is easy-to-read from almost any angle
- Time and date readout
- Auto-dimming brightness setting
- Shows historical weather information, including enhanced rainfall history
- Includes 12-24 hour feature forecasts
- Displays comprehensive weather information including indoor/outdoor temperature with **trend arrow**, **heat index**, **dew point**, indoor/outdoor humidity, barometric pressure with **trend arrow**, **wind speed/direction** & max wind readout

### AcuRite Iris (5-in-1) Weather Sensor

- Measures temperature, humidity, wind speed, wind direction, and rain
- Two solar panels power the internal fan to maximize ambient temperature accuracy at all hours of the day (standard AcuRite Iris (5-in-1) includes only one solar panel)
- Strong wireless range to 330 feet (100 meters)
- Transmits data every 18 to 36 seconds
- Automatic self-emptying rain collection cup
- 2-year battery life
- Durable, all-weather construction
- Easy installation includes mounting hardware

**Includes:** Digital Display, AcuRite Iris (5-in-1) Weather Sensor, mounting bracket, mounting hardware, power adapter

**Warranty:** Limited 1 year warranty
