Not working as of December 2022
★☆☆☆☆
Tried launching GoPro player in order to convert some videos I'm taking around Christmas. You can see the app running in Task Manager taking up CPU cycles, but nothing happens. Useless.

Have to Pay to use ReelSteady
★★★☆☆
the player is free and works good for checking out footage before I start editing. If you want to export files after adding ReelSteady or lens correction, it will cost $99 for the upgrade. I feel like if I'm paying $50 a year for the GoPro subscription, this should be included.
