About this item

- This brush is ideal for de-shedding double-coated dogs. Using patented two-tier teeth technology, the longer teeth gently remove dirt, reaching down to the undercoat, shorter teeth pick up loose hair.
- Polymer teeth makes the whole de-shedding experience kinder for your dog too as they reduce the risk of brush burn. Can be used on wet and dry hair.
- Some breeds of dogs - a Pomeranian, Shiba Inu and a Siberian Husky for example boast a double-coat of hair to keep lovely and warm. This is shed as the temperature rises or in a centrally heated home.
- A perfect all-round brush for superior de-shedding and de-matting, it's super easy to clean. Simply lift the hair from the teeth and rinse with warm water. Allow to dry naturally with teeth facing up.

About this item

- Using a patented two-tier teeth technology, the long teeth gently remove dirt, reaching confidently down to the undercoat, whilst the shorter teeth smooth the hair and protect against matting.
- For best results, brush gently at the knots until they begin to tease apart. Then give your dog a pleasurable brush all over to make them feel happy and relaxed!
- For light shedding breeds, knots and tangles can start to matt. We bet you've noticed them under the stomach and around the legs. It helps to gently brush hair more often.
- Treating them to regular brushing also helps prevent problems like painful matting and skin irritations. The result? One content doggie!
- Super easy to clean. Simply lift the hair from the brush teeth and rinse with warm water. Allow teeth to dry naturally with teeth facing up.
