

Bulk upload your business listings

If you have a large number of listings which you wish to submit to other websites, Yalwa offers a bulk upload service for adding your content easily onto the site.

If you have at least **20** listings, you can send your data to us for free and it will be automatically uploaded to the Yalwa business directory. Yalwa benefits include features such as no restrictions on the text limit for the description, html formatting and 10 images per listing.

Submitting many listings for bulk upload requires providing an XLS, ODS, or CSV file for Yalwa to use. You can also submit an XML file but this is not preferred. An XML feed must contain more than 1000 listings. Yalwa does not accept RSS feeds. Whichever type of file you submit must conform with our specifications to have your content included.

The specifications can be downloaded here:

- XLS, ODS, CSV PDF
- XML Feed PDF

Once you have read the specs and have an XML, XLS, ODS, or CSV file ready for upload, fill out the short form below and then click on the "Submit your file" button under the form. Yalwa individually inspects each file submitted and monitors content for quality, meaning that files are not guaranteed to be implemented, and if accepted can take a few weeks before being activated.

New Be ahead of the competition!

On Yalwa you can always be number 1. Our "Top listing" feature allows you to position your listings(s) ahead of your competition. Find out more and contact us today! Fill out the short form, mention your interest in being featured on top and then click on the "Submit your file" button below. We will be in touch shortly to discuss your opportunities to promote your listings on Yalwa.

Category matching

Please use the two boxes directly below to identify the categories related to the listings you wish to upload. Use the left box to search for a relevant category, and the ID corresponding to this category will automatically appear in the box on the right. The category ID must be included in the file you submit. Please see the appropriate specifications PDF above for more information.
