

AMENDMENT

Please amend the above-captioned application by deleting the recitation of goods in its entirety and substitute therefor the following:

Light emitting diodes for the purpose of lighting for illuminating signage and advertisements; electric lamps; light modules and lights with light emitting diodes as the means of lighting, namely, LED module chain for illuminated advertising applications for use as light fixtures; sources of light including light emitting diodes, namely, light emitting diodes light fixtures

REMARKS

This will respond to the Post Registration Office Action dated December 13, 2017 in the above-captioned application. Registrant filed a Declaration of Use or Excusable Nonuse under Section 71 on October 11, 2017 to amend the recitation of goods as registered. The description of goods, as amended, was not accepted as its scope was determined to have been broadened in violation of TMEP §1906.1(i).

Therefore, in an effort to comply with the rules of the U.S. Patent and Trademark Office, as well as those of the International Bureau, Registrant submits a new, amended identification of goods that sufficiently limits the described goods.

In light of the amendment, it is believed the recitation is appropriately limited and the Section 7 amendment should be approved.
