

MONITOR MANAGE MEASURE

MONITOR

OnePlus Compactor Fullness Monitors

This durable, first-of-its-kind compactor monitoring system provides control and visibility for any standard compactor. Our sensor technology and real-time reporting increase the volume of every compactor pick-up while reducing their frequency, resulting in substantial cost savings.

MONITOR MANAGE MEASURE

- Overview

+ Features

+ Tech Specs

The OnePlus Fullness Monitor can pay for itself in the first month. When a compactor container reaches a designated full level, the system sends a pick-up request directly to the hauler and designated recipients via email, text message or fax. All notifications route through our cloud-based software platform, which automatically generates management reports, offers real-time status updates, and can be customized to meet your need.

MANAGE

Sentry Access Guard

The Sentry Access Guard provides reliable way to manage waste compactors or baler access control. The result is better, more secure operational management.

- Overview

+ Features

+ Tech Specs

The Sentry Access Guard is an industrial-strength security device that controls access to compactors and balers 24/7/365. Ideal for use in multi-tenant or multi-department facilities, the Sentry allows only authorized users and supports up to 256 unique IDs. It is quick to install, easy to use, and simple to manage.
