---

## **Goods and services**

**Classes and terms**

---

**Class 1**

Custom made phase change materials, namely materials comprising a chemical solution or gel that can be heated or cooled for temperature control purposes; heat retaining chemical compounds, heat generating chemical compounds and suspensions thereto; chemical preparations being heat exchange substances packaged in sachets for use in the temperature control of insulating containers.

---

**Class 6**

Metal foil, including aluminium foil; Sheets and panels incorporating an aluminium film; Metallised reflective sheeting; Containers for transport of metal.

---

**Class 16**

Large-scale packaging, reusable or non-reusable, namely: Packaging materials, containers, boxes, cartons and sheet primarily made of paperboard, corrugated paperboard and/or plastics, all; specimen shipping containers made of corrugated paperboard and/or; packaging technology materials, included in class 16; flexographic print labels, sleeves and embossed goods for packaging; materials for packaging and foils of plastic for packaging; filling materials of cellulose fibre materials, namely crushed, pulverised or unravelled waste paper, cardboard or similar material, being an intermediate product for use in as panels or containers, packaging covers, shrink covers, sleeves, box inserts, wide film; Bags and sacks of all types; all the above for use in the field of packaging, transport and/or storage.

---

**Class 17**

Insulating materials and sheets, insulating paper and insulating tapes, reflective sheets and panels, laminated polyethylene sheets, reflective sheeting, floor insulation, heat reflective barriers, vapour control layers, polyethylene laminates incorporating coated reflective film, aluminised barrier film, thermal insulating materials, radiant heat barrier systems, coated sheets and vapour barriers, for general use and for use in boxes, packaging and transportation; plastics in extruded form for use in manufacture; plastic film for wrapping, blown film, semi-blown film, flat film, shrink films for heavy goods, fine shrink film for use in automatic machines and stretch films; embossed films; bags and sacks of all types, consisting of plastic materials or mainly containing plastic materials; Foam protective sections, in tube, sheet and sleeve form; insulating textiles and insulating textile goods; insulating bags for packaging, packing, stopping and insulating materials, in sheets and rolls; insulating materials included in this class.

---

**Class 20**

Transport containers made of wood or of plastics, or of a combination of wood and plastics, all having thermal insulating properties; Cases and containers of wood and /or of plastics; containers for transport not of metal; containers made of wood or of plastics, or of a combination of wood and plastics for packaging; Closures of all types, of plastic materials or mainly containing plastic; liquid nitrogen dry vapor shipping containers.

---

**Class 21**

Reusable, re-freezable ice packs for shipping and packaging use; food Boxes for chilled and frozen foods; vacuum flasks, insulated containers, jugs, boxes, chests, insulated packs, insulated bottle bags, steel vacuum flasks; thermal bags for the transportation of chilled and frozen foods.

---

### **Class 37**

Repair and maintenance of insulated shipping containers for transporting room temperature, chilled, and frozen materials; Repair, installation and maintenance of computer hardware systems for real time monitoring, trouble shooting and data collecting, storing and handling for container and load handling machines in ports, terminals and industry, computer hardware for use in cargo and load handling solutions, port operations, port and terminal equipment; Repair, installation and maintenance of scientific apparatus and instruments for use in cargo and load handling solutions, port operations, port and terminal equipment, port and terminal operations, port and terminal optimization, yard management and asset management.

---

### **Class 39**

Leasing of temperature controlled cases; rental of insulated shipping containers for transporting temperature controlled materials; packaging and storage of goods; rental of insulated shipping containers for transporting room temperature, chilled, and frozen materials; repair, installation and maintenance of computer hardware systems for real time monitoring, trouble shooting and data collecting, storing and handling for container and load handling machines in ports, terminals and industry, computer hardware for use in cargo and load handling solutions, port operations, port and terminal equipment; Transport; packaging and storage of goods.
