PATHFINDER

Powered by Busie

What is Pathfinder?

Pathfinder is an online routing software application, currently providing point to point routing, accessed through an easy to navigate web-based operator portal.

Why Pathfinder?

Built in collaboration with operators, *Pathfinder* uses cutting-edge mapping technology to route your trips safely while ensuring that the software is both functional and makes your lives easier. Our software guarantees that the normal challenges operators run into with large-sized vehicles are taken care of the right way, the first time.

Where Can I Sign Up?

Great question! You can request an invite to the platform at www.getbusie.com or drop us a note at hello@getbusie.com that includes the following information:

1. Full Name
2. Company Name
3. Work Email Address
4. Phone Number
5. Fleet size
6. Estimated # of users for the software

Our team will follow up within 24 hours to learn about your company needs and how you can unlock the most value out of *Pathfinder*.

How do I use Pathfinder?

Pathfinder can be accessed directly through our website once your company is signed up. Each company's administrator invites the team to the platform and from there you can start routing instantly!

Why Work With Us?

At Busie we believe in building products with operators, not just for them. To do this, our team ensures that operator feedback is included in every stage of our development process. We are dedicated to building smart solutions for Operators and Organizers to facilitate the online booking and management of trips, events, and other services.
