

Power your marketplace using OpenSea, blockchain's largest marketplace

With over 1 million digital assets, 1,000 ETH in transactions, and 50+ asset types, OpenSea is your one-stop shop for creating your own marketplace for your project. Whether you're creating a shop for your game items, collectibles, or another type of asset, we'll guide you through the entire process.

Fetch assets with our API & More

OpenSea provides an HTTP API for fetching non-fungible ERC721 assets based on a set of query parameters. Wallets and websites can now display:

Assets

Get assets filtered by a particular collectible type, or belonging to a particular wallet address

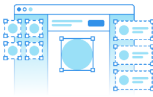

Activity

Get events happening on all assets (not just on our marketplace), including sales, listings, bids, transfers, and more

Profile

Get usernames and profile details for account addresses
