So, what do we *actually* do?

Aside from selling all kinds of foreign and domestic military surplus both in-store and online, there are many other facets of our business. If you haven't watched both of our videos on the homepage, here are all of our capabilities.

ITAR (International Traffic in Arms Regulations) Compliant Exporter

We are registered with the Department of State for exporting items regulated by ITAR. We can sell and ship/export ITAR related items to foreign governments and law enforcement, or help your company with any compliance issues. This includes any export controlled Commerce Department items as well. It is best that you contact us with any questions. Rest assured, we've done it before and have an ITAR compliance attorney on our team.

Government/LE Equipment Supplier

So what equipment can we get? Well, to make a long explanation short...anything. We have excellent relationships with numerous manufacturers and their distributors. We have supplied local agencies, special operations teams, and foreign governments with equipment from body armor to combat sights. Below is just a small sampling of what we can get.

- Night vision goggles (PVS-14, PVS-21, PVS-31)
- Laser aiming modules (PEQ-15, D-BAL)
- Combat sights (Armatron Tech, AimPoint, EOTech, Trijicon)
- Combat Uniforms (Beyond Clothing, Crye Precision)
- Body armor: Level IV ballistic plates, Level IIIA panels, helmets (Revision, Team Wendy, Opscore, Gentex)
 - Plate carriers and accessories (London Bridge Trading, Eagle Industries)
- Military freefall equipment; parachutes, strobes, helmets (Bonehead Composites, Manta, Core Survival)
 - Edged tools; automatic and manual (Benchmade, ZT, Spyderco, Strider Knives)

For any export items (ITAR or Commerce controlled), the equipment will be built according to the maximum allowed specifications for that country, or FOM (Field of Merit). For inquiries on more sensitive type equipment, please give us a call or send us an E-Mail.

Military Tactical Training

This is generally for foreign governments (obviously those allied to the United States) and is not for civilians. We are registered with the State Department as "Erokers" of training that is currently used by our military Special Operations personnel, and falls under ITAR. All of the instructors are current or former Special Operations operators with extensive training in their specialized fields. With our partners, we can provide the following training:
