

NORDIC INNOVATION HOUSE

We give Nordic companies, from startups to corporations, a head start in the most relevant global innovation hubs. By offering a strong community, connections to the local ecosystem, and programs for acceleration, we support you hit the ground running.

SCALING THE BEST OF THE NORDICS

Nordic Innovation House is a unique collaboration with the Nordic countries. We are a bridge connecting the cold corners of the globe with the main hotspots around the world. With backing from Nordic Innovation and the Nordic Council of Ministers, we bring Nordic entrepreneurship, values, and our way of doing business to the global innovation ecosystem. We bring together the most innovative entrepreneurs, all working to connect the dots – and getting connected. We offer an extended hand to help making yesterday's problems tomorrow's billion-dollar solution. What do Nordic businesses have to offer? Quite a lot, actually:

We come from a part of the world where rough natural conditions from early on taught us not to take anything for granted. We had to work hard, collaborate and be innovative to achieve success in life, both for ourselves and together. Trust, equality, and respecting others are values deeply rooted in our Nordic ways and culture. To reach new answers we are ready to change and to challenge: That is how we live, and that is how we do business

SERVICES

COMMUNITY

Whether it is a house of our own or access to a local co-working space, we offer our members a place to connect with an experienced Nordic community to support you hit the ground running.

SV NY SG HK

NETWORK

Entering a new market requires a local network and access to experienced mentors, service providers and advisors. We are here to connect you with the right people to get your journey started.

SV NY SG HK
