You need a strong foundation in finance.

Stonewain Systems Inc. knows that gaining operational efficiencies in this fast-moving world starts with the right software solution. You need to know what's happening around you, where you stand at the moment, and where you want to go. We believe that this market is ready for a comprehensive, fully integrated solution that combines industry-specific functionality with revolutionary technology and automation.

Our flagship solution combines your requirement for stability and reliability with your need for customization and flexibility. This scalable, seamlessly-integrated software solution, accelerates workflows, enables faster trading, and improves risk management and control.

Stonewain's Spire™ is an industry leading modular and scalable securities finance platform.

When you survey your financial landscape from a position of advantage, you're better able to move quickly, make informed decisions, and reduce your costs.

- Agency Lending
- Stock Borrows, Loans and Regulatory Locates
- Collateral Management and Optimization
- Cash Management

Spire offers a position of strength-

- Improve risk management and control
- Accelerate workflows
- Achieve major operational efficiencies
- Make faster trades

Add Spire to your technology array. As a comprehensive, fully-integrated front-, mid-, and back-office solution Spire's architecture integrates with your preferred technology choices, consolidating workflows and beautifully interlacing with proprietary systems.

Compatibility and integration are just the start.

We understand that flexibility, adaptability, easy migration and seamless integration are capabilities of paramount importance in the evolving financial market environment. Our solution offers valuable features, including export/import, MQ messaging, web services, and compatibility with key applications such as Loanet, EquiLend, Data Explorer, and more.
